

Rabies Protection

During the time you are a student in the Veterinary Technology Program at St Petersburg College, it is possible you will be exposed to the rabies virus through the animals you will contact. Considering this possibility, we highly recommend that you either be inoculated against rabies or if you have previously been inoculated to have your protective rabies titers checked.

If you choose to be inoculated, please record the dates of your inoculations below, and provide copies of the receipts for those inoculations.

If you choose to have your protective titers checked, please record the date your titers were determined, the results of that test, and a copy of the results for that check.

If you decline to be vaccinated against the rabies virus or have your titer level checked, please sign the Rabies Declination Form which is included with this letter.

If you have any questions, please contact the Veterinary Technology Program at 727-341-3653.

I was vaccinated against the rabies virus on the following dates:

First inoculation _____

Second inoculation _____

Third inoculation _____

Student's signature _____

I had my protective rabies titer tested on _____

My titer was _____

Student's signature _____
